# Emergency Relief Drinking Water Filters

British Berkefeld® ceramic filters are a popular and reliable way of providing safe drinking water to millions of people all over the world, often in the most demanding situations, including war zones and natural disasters.

They are used by many NGO's and Aid Agencies including: UNICEF, Medecins Sans Frontiers, British Red Cross, Oxfam, Save the Children, Peace Corps.

## CLEAN WATER KIT

- Complete kit to convert locally sourced plastic containers into a highly effective gravity drinking water filter unit.
- Contains a British Berkefeld® 10 inch ceramic filter candle and all fittings.
- Absolute filtration rating (>99.99%) of 0.9 microns.
- Filters out harmful bacteria and cysts.
- Removes >99.99% of E-Coli, Cholera, Typhoid, Shigella, Klebsiella, Cryptosporidium and Giardia.

## CERAMIC CANDLE HOUSEHOLD FILTER

- Complete, low cost gravity drinking water filter kit.
- Comprises 2x lidded plastic containers, 2x British Berkefeld® ceramic filter candles, tap and field assembly & use instructions.
- Supplied palletised in 100 kits per pallet for rapid deployment to relief zones.
- Filters out harmful bacteria and cysts.
- Removes >99.99% of E-Coli, Cholera, Typhoid, Shigella, Klebsiella, Cryptosporidium and Giardia.

## GRAVITY WATER FILTERS: MODELS SS2,3,4 & LP2

- A choice of either high grade polished stainless steel (corrosion resistant & durable) or food quality plastic (lightweight & virtually unbreakable) gravity drinking water filters.
- SS2, 3, 4 (stainless steel) gives a flow rate of 1.7, 2.5 or 3.3 litres of safe drinking water per hour respectively.
- LP2 (plastic) comes complete with 2x British Berkefeld® ceramic filter candles giving a flow rate of 1.7 litres of safe drinking water per hour.
- Filters out harmful bacteria and cysts, sediment and turbidity.

## RESCUE UNIT EMERGENCY DRINKING WATER FILTER SYSTEM

- Mobile multi-stage water purification system for use in field camps, field hospitals, mobile kitchens etc.
- Provides safe and clean drinking water in the field from almost any fresh water source. Gives a flow rate of 2-5 litres per minute.
- System removes bacteria, cysts, sediment and many dangerous metals and chemicals (Removes >99.99% of E-Coli, Cholera, Typhoid, Shigella, Klebsiella, Cryptosporidium and Giardia).
- Powered by a hand pump, 110-250V supply, or 12V car battery.
