HEALTHY LIFE

Royal counter-top water filter

Fairey is a new range of great value filter housings from the makers of Doulton® water filters. Each is fitted with a Doulton® ceramic filter candle, which offers multi-stage filtration in a single filter. You too can enjoy bottled water quality on tap in your own home.

The Royal is very simple to install. It fits to most common threaded mixer taps via a diverter valve and sits on the kitchen counter next to the sink. In the “on” position the diverter valve sends water through the filter unit and filtered water is returned to the special two-way diverter valve for easy access over the sink. In the “off” position, the diverter valve sends unfiltered water through the kitchen tap as normal.

The Royal has a stainless steel body and chrome plated brass head. It is fitted with a 49mm diameter “Slimline” ceramic candle, which offers flows of up to 300 litres per hour.
